Cyanotype Fabrics Capture Creative Child Award!

Healdsburg, CA (October 2016)

Jacquard Products is proud to announce that our **Cyanotype Fabrics** were awarded the **2016 Creative Child Product of the Year Award!**

[Cyanotype](#) is a photographic printmaking process that is so simple, even children can enjoy professional-quality results. We believe it is a fantastic way to introduce children to the magic of science, photography, nature and art, and the panel of educators, mothers and professionals at [Creative Child Magazine](#) wholeheartedly agree!

[Lessons from a 6 yr old: Cyanotype Mural Fabric](#)

Cyanotype Fabric is a wonderful and engaging project for any group--think birthday parties, day camps, classrooms, sports teams, etc.--and it is portable enough to take on hikes or to the beach. Offered in [8.5" x 11" sheets](#) or a [5' x 7' mural size](#), Cyanotype Fabric is great for kids who want to make their own one-of-a-kind prints, or for groups of children working collaboratively together. We even offer a [Class Pack](#) for groups of 30 or more. Children can make prints of their favorite toys, capture full-body forms or explore beautiful shapes found in nature: leaves, shells, stones, branches, flowers, etc. Every subtlety and shadow will be captured in the print!

[Andrea Bergart](#) led cyanotype workshops with children in Senegal. Check out the gallery [here!](#)

The Cyanotype printmaking process is not only super fun, it is also an excellent educational opportunity: it teaches creativity, resourcefulness, teamwork and patience, and it ties in extremely well with lessons on science, history, art, technology, and the power of the sun.
