BEST OF BAMBOO

Pre-coated, Paper-backed Bamboo Fabrics for Digital Fabric Printers

Healdsburg, CA (July 2010) - Jacquard Ink Jet Fabric Systems has added two new 100% bamboo fabrics, white twill and white sheeting, to their extensive line of natural and synthetic textiles for the digital printing industry. These exquisite bamboo have a fine "hand" and drape beautifully. They accept dyes extremely well with superb color yield and saturation. Both fabrics are available in either FabriSign or ProCoat coatings.

FabriSign Coating is compatible with any water-based ink on any fabric and requires no post processing - just print and use. This process is ideal for signs, banners and prototypes.

ProCoat coating is ideal when the printed fabric needs to be machine washable or dry cleanable. This coating requires that prints be steamed to develop color and produces commercial quality/industrial grade finished fabric.

Both the Bamboo Twill and Sheeting are available in 17"- 60" width bolts up to 50 feet in length. A complete sample swatch set (3½" x 4" swatches) of their entire line of fabrics is available for \$14. All fabrics are available in 6 foot sample pieces for \$35.

About Jacquard InkJet Fabric Systems

For over 10 years, Jacquard InkJet Fabric Systems has been processing fabric for digital printing, providing fabric and inks for the commercial textile industry, as well as, providing custom coating

services to digital printing firms.
