Introducing Jacquard's Screen Drawing Fluid and Screen Filler & Block Out

Healdsburg, CA (July 2012) - Jacquard Products is pleased to premiere two new screen printing products that round out Jacquard's screen printing line. Jacquard's [Screen Drawing Fluid](#) and Jacquard's [Screen Filler & Block Out](#) provide screen printers the tools to create stencils directly on their screens, without the headaches of photo emulsion or cut outs.

The Screen Filler & Block Out can be applied directly onto a screen to create negative-space stencils, to block out portions of the screen or to fix pinholes. It is an indispensable tool for any printer. Used in tandem with Jacquard's Screen Drawing Fluid, one can also easily create positive-space stencils in a screen. Simply apply the Screen Drawing Fluid to the screen fabric wherever you want to print, allow it to dry and then coat the screen with the Screen Filler & Block Out. The Screen Drawing Fluid acts as a resist to the Screen Filler and will easily wash out with water. This process leaves open spaces in the screen wherever the Screen Drawing Fluid was applied! Creating stencils in a silk screen has never been easier. With this system it becomes especially easy to achieve a painterly look, because all brush strokes will translate to the print.

Jacquard's Screen Drawing Fluid
