THE FINISHING TOUCH

SteamJet Fabric Finisher THE Answer for Digital Fabric Printers

Healdsburg, CA (July 2010) - Jacquard InkJet Fabric Systems' has changed the unpredictable art of steam-setting dyes into an exact science. The SteamJet Fabric Finisher is the first low-pressure, short-run production steamer for fixing disperse dyes. Its patented design uses low pressure to deliver highly-efficient steam cycles.

Disperse dye on polyester is fixed in only 10 minutes at 240° F. This method of fabric finishing yields significantly better color "bloom," penetration and most importantly, superior light-fastness compared to the transfer process. The SteamJet Fabric Finisher produces consistent, reliable results in disperse dye fixing every time!

Product features include: safe and simple to operate; no water hookup required; electronic time and temperature controls; unique, angled design for easy loading; special steaming core; UL and CE certified.

About Jacquard Inkjet Fabric Systems

For over 10 years, Jacquard InkJet Fabric Systems has been processing fabric for digital printing, providing fabric and inks for the commercial textile industry, as well as, providing custom coating services to digital printing firms.
