

PRINTFIX

PROFESSIONAL PROTECTIVE SPRAY

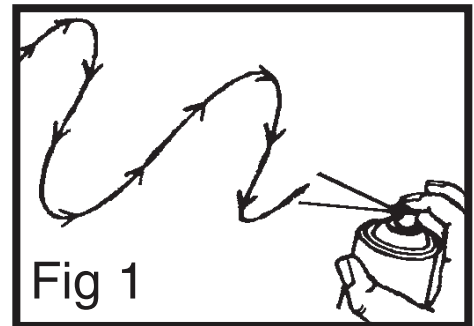

Jacquard PrintFix is a low odor aerosol spray that protects dyed fabrics, inkjet prints, and artwork from UV fading, moisture, fingerprints, and dust. Simply spray PrintFix over silk paintings, giclee & inkjet prints, watercolors, or any other painted, printed or dyed object to greatly increase UV resistance to fading. It increases scratch resistance, protects against smudging, and seals the image against moisture, dust and humidity. Also effective on wood, leather, epoxy, polymer clay, canvas, and more. Fast-drying and non-yellowing, PrintFix does little to alter the appearance of the original media characteristics, while providing long-term protection and stability.

Instructions:

1

Shake well before use. Lightly spray from a distance of 10"-12"/25.4-30.48 cm onto the flat print. Following the pattern shown in Figure 1.

2

Allow to dry for 3-4 minutes, rotate the print through 90° and repeat the above process. For the optimum protection, 2-3 coats are required.

3

To prevent nozzle clogging, turn the can upside down and press the nozzle for 1-2 seconds at the end of each day of use. As shown in Figure 2.
